PROFILE

I am a dedicated professional who have led and produced high impact work (published in journals such as Nature and Science) that has garnered 5k+ citations. My expertise lies in utilizing scalable Bayesian methods and models to gain a comprehensive understanding of complex public health and biological phenomena. I have experience in spatio-temporal models, survival models, computer vision models and scalable inference techniques.

EXPERIENCE

Novartis, Dublin, Ireland Since January 2023
Principal Biostatistician

I am developing original statistical methods for pharmaceutical applications. I am also concurrently collaborating on a joint initiative with the FDA to integrate MRI data for survival prediction using deep learning.

Imperial College London, London, United Kingdom Since April 2023
Academic Visitor

I engage to ongoing research collaborations with academic faculty, PhD students, and MSc students.

Novartis, Basel, Switzerland 06/2021 - 09/2021
Advanced Explanatory Analysis Intern

Supervisor: Dr. Sebastian Weber

I have developed a time-to-first-event safety model that uses pharmacokinetic principles in the context of phase I oncology dose-escalation trials with multiple schedules.

University of Geneva, Geneva, Switzerland 07/2017 - 09/2017
Summer Research Assistant

Supervisor: Dr. Bernard Cerutti

I have investigated cross-sectional medical data from the Hospital of Geneva to determine optimal training schedule for health personnel.

EDUCATION

Imperial College London, London, United Kingdom 2019-2023
PhD in Modern Statistics and Statistical Machine Learning

Thesis title: Bayesian models and methods to estimate age-specific infectious disease transmission dynamics: integrating disease surveillance time series, mobility, and vaccination data

Supervisors: Dr. Oliver Ratmann, Prof. Samir Bhatt, Dr. Matthew Hall

First student to complete the program among a cohort of 14 students in Imperial College London and Oxford University

Imperial College London, London, United Kingdom 2018-2019
Master of Science in Statistics
Final Grade: Distinction

University of Geneva, Geneva, Switzerland 2015-2018
Bachelor of Science in Economics and Management
Final Grade: 5.71/6, **Class Rank:** First out of > 100 students
Major in Economics and minor in Statistics

PROGRAMMING SKILLS	<p>Highly proficient in R, Stan and L^AT_EX.</p> <p>Open source code:</p> <ul style="list-style-type: none"> • Model for characterizing COVID-19 spread: https://github.com/ImperialCollegeLondon/covid19model • Regularised B-splines Projected Gaussian Process Priors: https://github.com/ImperialCollegeLondon/BSplinesProjectedGPs • Analysis of age-specific HIV transmission dynamics: https://github.com/MLGlobalHealth/phyloSI-RakaiAgeGender
AWARDS	<p>EPSRC CDT in Modern Statistics and Statistical Machine Learning Scholarship 2019-2023 Imperial College London, London, United-Kingdom</p> <p>The Department of Mathematics Scholarship for the MSc Statistics 2018 Imperial College London, London, United-Kingdom Awarded for academic excellence and ability to continue into a postgraduate research degree.</p> <p>Highest overall grade average of the Bachelor's Degree in Economics and Management - Major Economics 2018 University of Geneva, Geneva, Switzerland</p>
TALKS	<p>StanCon 2020 2020</p> <p>COVID-19 Dynamics & Evolution Webinar Series, University of California San Diego 2020</p> <p>Banff International Research Station for Mathematical Innovation and Discovery 2021</p> <p>ISBA 2022 World Meeting 2022</p>
